## ALLOY DESCRIPTION AND APPLICATION;

70S-6 Premium Copper Coating carbon steel that contains high levels of manganese and silicon for stronger deoxidizing power and has excellent welding results on mild steels where poor fit-up, rust and oils may be present. The single sourcing of the green rod with ultra-concise premium copper coating yields unsurpassed arc and feeding with extended wear on tips and liners. Often used on mild/low alloy steels in applications not limited to: sheet metal, bridges/pipes, shipbuilding, auto industry/repair and all industries/fabrications of mild steels. Manual, semi-automatic or automatic welding using pulse, spray transfer, short circuit transfer with many gases such as 100% CO<sub>2</sub>, 75-95 Ar/15-25 CO<sub>2</sub> and 95-98 Ar/ 2-5 O<sub>2</sub>.
